Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.

UNITED STATES.

CURRENT STATE SUMMARIES.

Telegraphic Reports for Week Ended May 14, 1921.

These reports are preliminary, and the figures are subject to change when later returns are received by the State health officers.

RECIPROCAL NOTIFICATION.

Cases of communicable diseases referred during April, 1921, to other State health departments by Departments of Health of the States of Connecticut and Massachusetts.

Connecticut.

Disease and locality of notification.	Referred to health authority of—	Why referred.
Leprosy: Waterbury, Conn.	State Department of Health, Albany, N. Y.	Patient, a native of Latvia, Russia, lived in New York City, 1904–1916, when first symptons of leprosy appeared. Patient has lived in Waterbury since 1916.
Tuberculosis (pulmonary): South Norwalk, Conn.	do	Patient went to Cairo, N. Y., for treatment.
Diphtheria: Granby, Conn.	do	Patient had onset 3 days after leaving New York City.
Smallpox: Manchester, Conn.	State Department of Health, Lansing, Mich.	Patient, a known contact with smallpox case in Detroit, became ill 2 weeks later in Providence and on arrival in Manchester, Conn., was quarantined.

Massachusetts.

Typhoid fever: North Brookfield, Mass.	State Department of Health, Albany, N. Y.	Patient was ill at her home about 1 week prior to her visit to North Brookfield.

PLAGUE.[1]

HUMAN CASES OF PLAGUE REPORTED.

Place.	Period covered.	Cases.	Deaths.	Remarks.
California:	1921.			
San Benito County	Feb. 7		1	

[1] A summary of the report received of the occurrence of plague and the finding of plague-infected rodents in the United States during 1920 was published in Public Health Reports, Jan. 7, 1921, p. 15.

PLAGUE-INFECTED RODENTS.

Place.	Period covered.	Rodents found plague infected.
Florida:	1921.	
Pensacola	Jan. 1 to Apr. 18	5
	Apr. 19 to May 14	0

CITY REPORTS FOR WEEK ENDED APRIL 30, 1921—Continued.

TYPHOID FEVER.

The column headed "Median for previous years" gives the median number of cases reported during the corresponding weeks of the years 1915 to 1920, inclusive. In instances in which data for the full six years are incomplete, the median is that for the number of years for which information is available.

Place.	Median for previous years.	Week ended Apr. 30, 1921.
